

Macula CARE

BEST® LUTEIN

LUTEIN
100%
PURE

PRODUCT DESCRIPTION

Food supplement based on lutein and minerals.

Pharmacological actions

Macula care contains lutein. Lutein is concentrated basically in the macula of the eye. It has antioxidant properties, preventing macular degeneration.

INDICATIONS

Macula care is indicated to prevent macular degeneration.

RECOMMENDED USES

It is recommended to take 1 capsule a day. Do not exceed the stated recommended daily dose.

PRODUCT INFORMATION

Box containing 30 capsules of 495 mg.

30 495 mg

INGREDIENTS

Bulking agent (maltodextrin), extract from the flower of *Tagetes erecta* (100 mg) (with 5 mg of lutein and 0.055 mg of zeaxanthin), capsule (gelatin, titanium dioxide (E171)), vitamin C (L-ascorbic acid), zinc sulfate, vitamin E acetate (D-alpha tocopheryl acetate).

NUTRITIONAL INFORMATION

per dose - 1 capsule		%RDI - 1 capsule	
Vitamin C	80 mg	1	100%
Vitamin E	12 mg		100%
Zinc	5 mg		50%

%RDI: Recommended Daily Intake

CONTRAINDICATIONS: Not found

ADVERSE REACTIONS: Not found

Food supplements should not be used as a substitute for a varied and balanced diet and a healthy lifestyle.

Store in a cool, dry place. Protect from light. Keep out of the reach of young children.

Macula lutea

Macula lutea is located in the small central part of the retina that gives definition of fine details of the eye (allows the central vision yield).

Ager Related Macula Degeneration (ARMD) is a cesion or macula breakdown. It usually develops first in one eye and then in the other, and worsens with age. It is characterised by damage to, or deterioration of, the small blood vessels in the eye. ARMD never causes complete blindness.

Benefits of lutein

Lutein has been found to have specific applications for the eye. Lutein and zeaxanthin are the only two carotenoids found in significant amounts in the retina, lense and macula, where they play an important role as a result of their antioxidant and anti-inflammatory properties and filter UV radiation. Lutein absorbs blue light (potentially the most harmful to the retina), thus preventing it from damaging the retina, and also acts as an antioxidant, thereby protecting against the damage caused by free radicals.

Macula care is carefully formulated on the basis of purified lutein and antioxidants such as vitamin C, vitamin E and zinc, which act synergically.

The fact that this composition contains pure lutein, which has a higher bioavailability than lutein esters, ensures that this product occupies a unique niche in the market.
